## FINE NAMED HYACINTHS

### All First Size

The single-flowered varieties are generally more effective than the Double ones, and they are also better for glasses. The Double varieties are marked with an asterisk (\*).

**SPANISH IRIS (*Iris Hispanica*)**

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect slightly in the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.
